Google Science Fair

Google just announced this year's 15 finalists in the Google Science Fair. Projects include everything from cancer detection to environmental protection.

These kids are chosen from a pool of 90 semi-finalists. Five projects are chosen in each age group from all over the world — Canada, USA, Russia, Singapore, India, Greece, Turkey and Australia.

On September 23 the finalists will present their projects to an international panel of esteemed scientists for judging. The Grand Prize winner will receive a 10-day trip to the Galapagos Islands with National Geographic Expeditions, \$50,000 in scholarship funding and more.
